China Europe International Business School

Research Assistant

December 2021

Beijing, China

- Verified data from law database of Pecking University, improving the accuracy of natural language processing.

Projects

Green Finance, Government and Carbon Emissions

June 2021 - May 2022

- Used the data of 285 cities in China from 2013 to 2017, exploring the impact of green financial development on carbon emission through panel data model and controled the endogeneity of the related variables based on the different model settings and variable measures.
- found that financial development has a positive impact on carbon emission while the number of Green Finance Reform Pilot Zone, the number of green finance cooperation projects carried out by government and market entities, investment in environmental pollution control and eco-friendly facilities have negative impact.
- Concluded that the government should better support the development of green finance, promote the financial industry to leapfrog the extensive development stage, and thereby accelerate the achievement of carbon peaking and carbon neutrality goals.

What Factors Influence Migrant Workers' Medical Welfare

Feb. 2021 - May 2021

- Sorted out the policies of off-site medical treatment and analyzed the current situation of migrant workers seeking off-site medical treatment.
- Selected the welfare index with theoretical analysis and expert consultation, established a medical satisfaction measurement system and designed questionnaires for migrant workers.
